## § 891.320 Site and neighborhood standards.

In addition to the requirements in §891.125 and §891.680, if applicable, the following site and neighborhood requirements apply to the Section 811 Program:

(a) Travel time and cost via public transportation or private automobile, from the neighborhood to places of employment providing a range of jobs for very low-income workers (or low-income workers, as applicable), must not be excessive.

(b) Projects should be located in neighborhoods where other family housing is located. Projects should not be located adjacent to the following facilities, or in areas where such facilities are concentrated: schools or daycare centers for persons with disabilities, workshops, medical facilities, or other housing primarily serving persons with disabilities. Not more than one group home may be located on any one site and no such home may be located on a site contiguous to another site containing such a home.

## §891.325 Lead-based paint requirements.

The requirements of the Lead-Based Paint Poisoning Prevention Act (42 U.S.C. 4821-4846), the Residential Lead-Based Paint Hazard Reduction Act of 1992 (42 U.S.C. 4851-4856), and implementing regulations at part 35, subparts A, B, H, and R of this title apply to the Section 811 program and to projects funded under §§891.655 through 891.790.

[64 FR 50228, Sept. 15, 1999]

EFFECTIVE DATE NOTE: At 64 FR 50228, Sept. 15, 1999, §891.325 was revised, effective Sept. 15, 2000. For the convenience of the user, the superseded text is set forth as follows:

## $\$\,891.325$ Lead-based paint requirements.

In addition to the other Federal requirements described in §891.155, the following lead-based paint requirements apply to the Section 811 Program and to projects funded under §8891.655 through 891.790:

(a) The requirements of the Lead-Based Paint Poisoning Prevention Act (42 U.S.C. 4821-4846) and implementing regulations at 24 CFR part 35 (except as superseded in paragraph (b) of this section) apply to the dwellings (except zero-bedroom dwelling units or

units that are certified by a qualified inspector to be free of lead-based paint or the lead-based paint hazards have been eliminated) in housing assisted under this subpart and to projects funded under §§ 891.655 through 891.790 that:

(1) Were constructed before 1978; and

(2) In which any child under 6 years of age resides or is expected to reside.

(b)(1) This paragraph (b) implements the provisions of the Lead-Based Paint Poisoning Prevention Act, 42 U.S.C. 4821 et seq., by establishing procedures to eliminate, as far as practicable, the hazards of lead-based paint poisoning with respect to covered structures for which assistance is provided under the Section 811 Program and under \$\$891.655 through 891.790. This paragraph (b) is promulgated under 24 CFR 35.24(b)(4) and supersedes, with respect to these programs, the requirements prescribed in subpart C of 24 CFR part 35.

(2) The following definitions apply to this section:

Applicable surface means all intact and nonintact painted interior and exterior surfaces of a residential structure.

Chewable surface means all protruding painted surfaces up to five feet from the floor or ground, that are readily accessible to children under 6 years of age, e.g., protruding corners, windowsills and frames, doors and frames, and other protruding woodwork.

Defective paint surfaces means a surface on which the paint is cracking, scaling, chipping, peeling, or loose.

Elevated blood lead level or EBL means excessive absorption of lead: that is, a confirmed concentration of lead in whole blood of 20 ug/dl (micrograms of lead per deciliter) for a single test or of 15-19 ug/dl in two consecutive tests 3-4 months apart.

Lead-based paint means a paint surface, whether or not defective, identified as having a lead content greater than or equal to 1 mg/cm2 (milligram per square centimeter) or .5 percent by weight or 5000 parts per million (PPM)

(3) In the case of a structure constructed before 1978, the Sponsor must inspect the structure for defective paint surfaces before it submits site information. If defective paint surfaces are found, treatment in accordance with paragraph (a)(5) of this section is required. Correction of defective surfaces found during the initial inspection must be completed before initial occupancy of the project. Correction of defective paint conditions discovered at periodic inspection must be completed within 30 calendar days of their discovery. When weather conditions prevent completion of repainting of exterior surfaces within the 30-day period, repainting may be delayed, but covering or removal of the defective paint must be completed within the prescribed period.
